ENDECK[®]
PVC DECKING

Wood decks only look good and cost less for the first year.

Sure, wood decking can be less expensive to begin with. And, just as you get used to the somewhat green tinge and profusion of knots, wood decking starts showing its age. The warm color of wood fades to a dull grey, until mold and mildew turn it green again. Splinters will surface. Boards can warp, twist and sag.

Continuous Maintenance Adds Up

- Eats at your free time
- Runs up expenses
 - Power Washing, Sanding, Scraping, Staining, and Replacing Twisted Boards*

Composites and Capped Composites are the original alternative to wood. But the little bit of wood fiber inside them has led to their downfall.

Composites and Capped Composites were intended to be the environmentally friendly replacement for wood decking, but after a lot of the overpromising of 'total maintenance freedom', many shortcomings became evident.

- Mold & mildew attack the surfaces
 - Leave black streaks and spots*
 - Almost impossible to remove*
 - Can absorb moisture, causing planks to swell*
- Colors can fade
- Easily stained
- Retains heat; hot to the touch
- Can deteriorate over time

Endeck PVC vs all others.

It takes a pretty thick skin to stand up to all the punishment delivered to your deck.

With all the activity intended for your new deck, plus everything Mother Nature will throw at it, you need a deck plank with a tough outer shell.

Endeck Employs a Tougher Capstock

- Proprietary formulation
- Years of proven weatherability
- Consistent strength and endurance
- No moisture penetration or delamination
- Stain-resistant finish
- Excellent traction wet or dry
- Code approved
- Class-A flame spread

Introducing Endeck Forest™ Series.

Definitely a strong statement—
with a deeply embossed wood grain
and subtle variegated colors.

The deep, rich colors that run through Endeck Forest Series lend a natural beauty that is only found on the most expensive, exotic hardwoods. Our process allows for a consistent plank color from piece to piece, but the color variations are as random as those found in nature.

And, even though the colors run dark, Endeck manufacturing technology allows the decking underfoot to remain comfortable, and cooler to the touch—even on the hottest days.

Chestnut

Sequoia

Cedar

Colors shown are by the lithographic process and may vary slightly from actual product.

Endeck is 100% cellular PVC, with no wood fibers or fillers. It won't rot, warp or crack like wood or composites and capped composites.

Endeck is stain-resistant, scratch-resistant and slip-resistant.

Endeck PVC is made to withstand all conditions—environmental and manmade—from the constant punishment of UV rays from the sun, to rain, sleet and snow, to the barrage of kids, neighbors and friends scuffing their shoes, dragging deck furniture, and dropping ketchup, mustard and hamburger grease all over it. Not to mention pets and their dirty paws and scratching claws.

Tough outside and even tougher inside.

Endeck boards are strong, durable, engineered to resist sagging, and lighter in weight than composite, capped composite or treated wood deck boards. The proprietary compounds used give Endeck a more uniform cell structure—eliminating the voids commonly seen in competitive PVC decking. Endeck boards meet or exceed stringent AC10 and AC174 standards, and are CCRR-0144 approved.

Enrail® Vinyl Railing Systems. Decking and Railing that go hand-in-hand.

Enrail is an easy-care railing system that has great architectural appeal for today's homes.

The Enrail vinyl railing system is engineered for a higher standard of living, so you can trust your rail for a lifetime of performance and good looks. Enrail is more than just durable, sturdy and safe. You receive the perfect complement to your home's architectural style with ultimate flexibility of design options. Enrail vinyl railing also meets or exceeds stringent AC10 and AC174 standards, and is CCRR-0144 approved. Available in three handrail styles (at right).

Series 100
2" x 3.5" railing is contemporary and straightforward

Series 200
Add real architectural appeal with the strong shadow lines of the T-Rail system

Series 300
Soft curves of this railing system work to conceal the amazing strength inside

Unlike wood, Endeck and Enrail come with a Lifetime Limited Warranty.

Enduris warrants its Endeck Decking and Enrail Railing products, subject to the terms, conditions and limitations, are free from defects in material and workmanship. When installed under normal conditions and proper use, Endeck and Enrail will not peel, pit, rot, blister, warp, crack, abnormally weather or be consumed by insects. For warranty details, visit our website at enduris.com.
